All coaches, student-athletes and approved school personnel are required to complete an in-person COVID-19 Screening PRIOR to entrance to the training session.

No parents or spectators will be allowed at Fall Training in-person practices. Only coaches, student-athletes cleared for practice, athletic trainers, and approved school personnel will be permitted. Students who will not be participating due to injury, clearance, etc. will not be at training. Only those who are actively participating that day.

One point of entry to each facility, one point of exit – preferably different than the entrance if possible.

Coaches will conduct the screenings and document DAILY the results of these screenings, which will also serve as attendance if contract tracing needs to occur. Coaches will prepare a check-in station at the facility entrance with the monitoring form, pens, thermometer, gloves, masks, sanitizer. Multiple stations can be setup for larger groups.

Those entering the facility for training will create a line at the entrance while maintaining physical distance of a minimum of 6 feet. Masks must be worn at all times – including during the screening process and after entering the facility – unless participating in strenuous activity.

When an individual approaches the check-in station
  o Temperature will be taken of each person attending the training session with a no-touch digital thermometer. The thermometer must be 1.5 to 2 inches from the forehead to work correctly. Take multiple times if necessary. If the individual shows signs of a fever they will not enter the facility. Better to miss the day than expose others. While 100.4 is the official number for a "fever," any elevated temperature that is not normal for that person should be considered a suspected fever.
  o Screening questions will be asked of each person attending the training session. Questions should be printed and presented to the individual for better understanding. Any approved adult or student-athlete answering YES to any question will not be allowed to enter the facility or practice. Contact parent/guardian immediately about next steps and pick-up. Follow procedure to notify the athletic director who will work with the PSD Health Services Coordinator on the next steps.
  o Stress that responsible reporting requires an honest answer. False reporting endangers everyone at the training session and is a violation of the PSD Athletic Code.

After clearing the screening area, individuals should immediately sanitize their hand at a station near the entrance.

Daily screening forms will be kept in a notebook, easily accessible on campus in the event contact tracing is necessary. At the end of Fall Training the screening forms will be turned in to the building AD. The forms must be kept on file for six years. Do not discard any form with data on it.
