

Directions for Students to Set-Up and Use Class Notebook!

Go to your Puyallup School District Email and look for an email from your teacher who is setting up and using Class Notebook!

And click on the link to open:

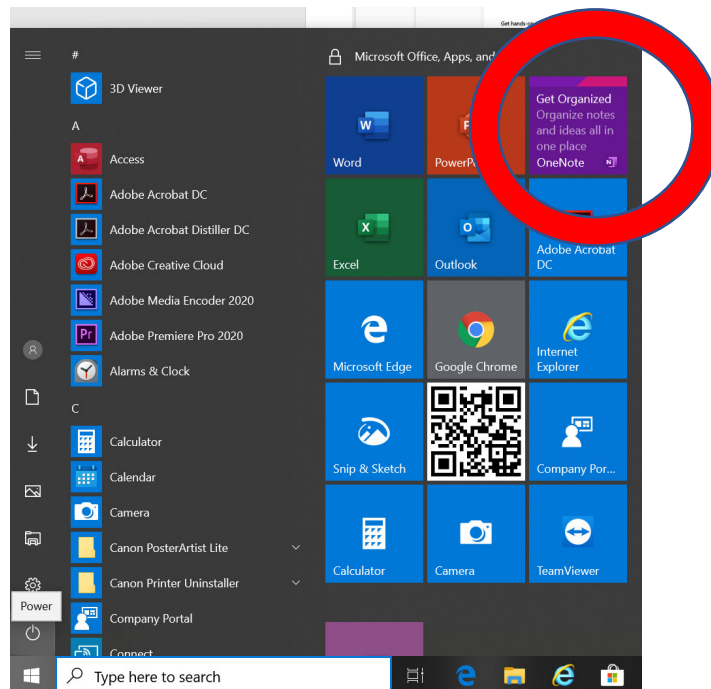

This will open your new Class Notebook in the online version:

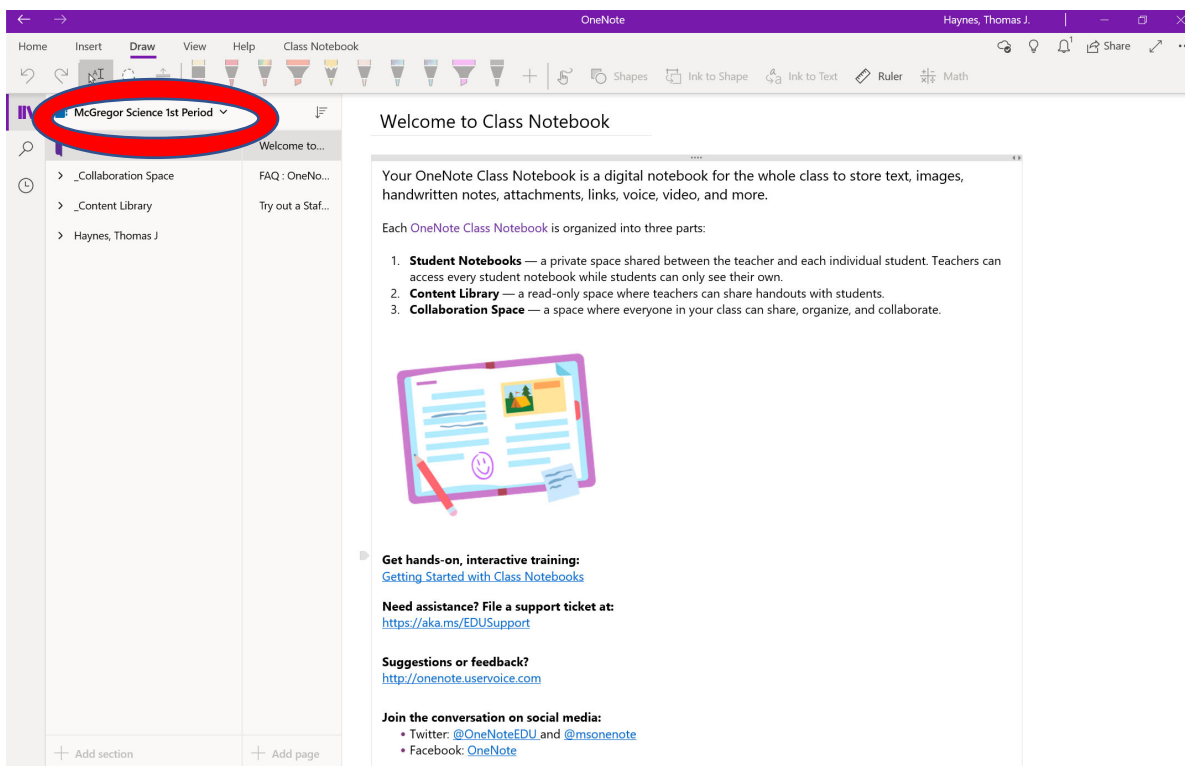

This step you will only have to do once:

Click the "Open in App" button!

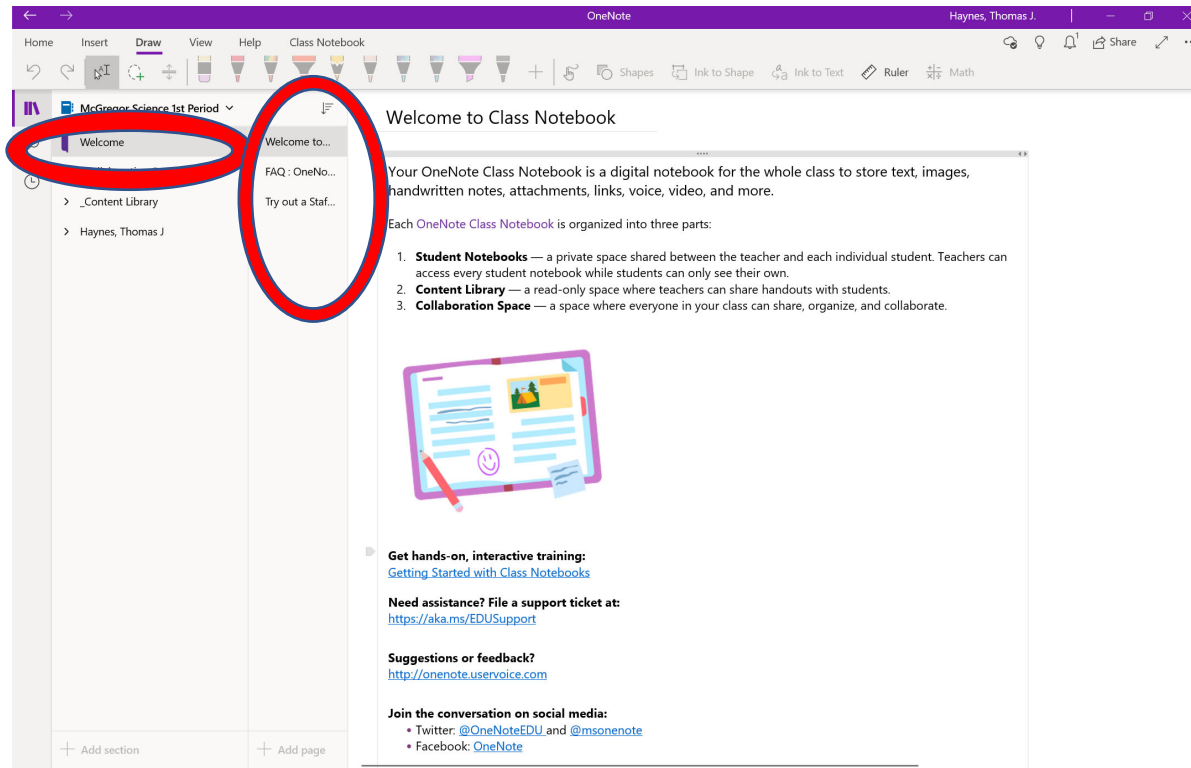

From now on when you use OneNote, you won't go to your email- you will go to your start menu and select your OneNote app:

Once it opens, here is where you select a drop down to switch between different Class Notebooks if you have more than one (ie Math and English)

The teacher creates content and lessons in this space! Students cannot write or edit this space. It is a view only, and is where you look for a day's lesson.

Where you write (using a keyboard or digital pen) is in the section with your name. Pay attention to the folders, because most likely, you will need to do your learning in the homework section for a teacher to be able to review it!
